- [EGNOS for Maritime...](#)

And a lot more videos are available.

If you have **leadership and team building skills** with a **good level of English** and proficiency in methods of development and evolution of complex software and **5 years of experience in satellite navigation (GNSS)** and **3 years of experience in a field relevant to management and development of software and tools**, then this position is for you!

**By joining us, your role will be to ensure the steady and fluid operation of the Mission Performance Unit by means of checking the correct operation of Mission Performance tools, developing new software, defining new requirements and managing the development and acceptance of the tools.**

**Your main responsibilities/activities will be:**

- Coordination of the team in charge of maintaining and evolving Mission Performance Tools,
- Maintain the performance tools, networks and connections so that they can be operated in nominal conditions,
- Management of the obsolescence and guarantee of Mission Performance tools,
- Management of observation reports, configuration management, control of changes and documentation management,
- Raise Observation Reports for the anomalies found in Performance Tools;
- Maintain and develop scripts and software related to the exploitation of tools
- Maintain and evolve softwares to provide real time information to users (internal and external users),
- Proposition of evolutions on tools; be responsible for the acceptance of new or evolved performance tools and to participate actively during the corresponding industry qualification milestones,
- Support the EGNOS System formal Reviews,
- Coordinate and supervise the installations and deployments related to performance tools.

Trust, from space to cockpit,  
for one clever sky.

## PROFILE
