In ESSP we are looking for a:

SOFTWARE QUALITY ENGINEER - (F/M)

The **Software Quality Engineer** is responsible for the **assurance and control activities of software development**, maintenance, and acquisition, in collaboration with Project Leaders, Functional and Technical leaders. You will also be in support to adapt applicable processes to each software project.

If you are a good **team worker** with **5 years in the industry (space, aeronautics, rail, automotive) in the domain of software quality**, this is your opportunity!

Your main responsibilities/activities will be:

Support to software development, maintenance and acquisition

In collaboration with Project Leaders, Functional and Technical leaders:

- Contribute to the preparation and implementation of Project Plans (PMP, Quality Assurance, control, configuration management plan, documentation management plan, and validation plan). You will help to understand processes and their adaptability to the project context to produce adapted and efficient plans,
- Perform quality controls according to the project control plan (documents review, tests monitoring, anomalies follow-up... according to standards such as ECSS or DO178),
- Contribute to impact analysis of changes,
- Provide support for methods, advise members of the projects, ensure proper implementation of risk and action management,
- Work in collaboration with the other team members, for delivery, planning, or budget,
- Anticipate risks related to non-quality and alert the Project Leader and manager,
- Ensure the update of the Tools Repository by the Functional leader of the software application.

Support to software applications :

- Validate the functional specifications produced,
- Validate tests plans,
- Support on interactions with the IT department,

Management of the ESSP software applications repository:

- Ensure the regular update of the ESSP software applications repository,
- Maintain the associated procedure and the structure of the repository,
- Produce customer deliverables related to the ESSP software applications repository.
- Ensure satisfaction of all customers or company functions that need proper data in the repository,etc.)

Reporting & Continuous improvement:

- Manage information and training sessions related to Software Quality assurance and control,
- Propose and lead improvement actions on their activities,
- Collect new needs and needs for evolution (lessons learnt, satisfaction surveys, etc.),
- Manage associated reporting for their perimeter of activity,
- In charge of the implementation of the audit corrective actions in their perimeter of activity.

JOB REQUIREMENTS:

Languages: High English Level (B2) - CEFR

Engineering degree or equivalent

- Proficiency in Software Quality assurance/ control
- Capacity to adjust processes to implementation context
- Good knowledge of Project Management
- ECSS, DO178, software quality standards,
- Animation skills
- Riguour, Ability to summarize
- Good interpersonal skills
- Adaptation skills
- Office usual software proficiency (MS Office Excel, ...)

Human Resources information:

- 1st interview is held by **the direct manager** of the position you applied for (technical interview)
- 2nd interview is held by **HR department**

Element of package of remuneration:

- **Variable:** bonuses based on objectives
- **Profit-sharing**
- **Teleworking:** up to 2 days/week
- **Tickets Restaurant** (card)
- **Family Health insurance**
- **Sustainable Mobility Package:** Home/Office travels reimbursement if car sharing or bicycling
